

# UltraViolet (UV) Water Sterilizer

## UltraViolet (UV) Water Sterilizer

- UV Light Sterilizers are an efficient, reliable, and low maintenance way to disinfect your water supply without adding chemicals.
- Chlorine has a limited ability to kill certain parasites, has potential health concerns and adds more equipment and cost to your filtration system.
- UV Light quickly & effectively destroys micro-organisms in 1 to 5 seconds. Chlorination systems require up to 30 minutes to destroy bacteria.
- UV Light Sterilizers take up no floor space and consume less electricity than a 40 watt light bulb.

### Water Quality Requirements:

- \* Hardness < 7 gpg  
*(If water hardness exceeds 7 gpm, the water should be softened)*
- \* Iron < 0.3 ppm
- \* Turbidity < 5
- \* Manganese < 0.05 ppm
- \* Operating Pressure 10 to 100 psi
- \* Temperature 36 to 104 °F
- \* Inlet / Outlet 3/4" MPT

### Other:

- \* Electrical Requirements 110 / 230 vac
- \* Chamber Material 304 Stainless Steel
