

BETTER WATER LLC

Water Cooler Dispenser 1000 Series

Office

Hot & Cold Water Dispensers

This 2 temp water cooler is economical and affordable. Stands alone and has an optional cup dispenser. It is available with a built-in refrigerator compartment. This cooler is a great way to compliment your office, break room, or kitchen at a great price!

Fresh, clean, crystal clear water cold & hot and never runs out! Bottled water is not fresh and is questionable in its purity. Bottles hold a limited amount of water and can be a hassle to change out. Our 50 gallon per day water cooler dispensers utilize reverse osmosis, the most sophisticated water purification process, to remove up to 98% of impurities and contaminants from the water before being dispensed.
